Public Goods and Cheating

- ▶ When quorum is reached, bacteria produce a “public good”

- ▶ When quorum is reached, bacteria produce a “public good”
- ▶ Everyone benefits from this even if they don't contribute

Public Goods and Cheating

Figure 2: Eldar (2011)

- ▶ When quorum is reached, bacteria produce a “public good”
- ▶ Everyone benefits from this even if they don't contribute
- ▶ Cheaters DO prosper (if you are a bacterium)

Model

Signal-Receptor Activation Matrix K_{ac}

- Represents all receptors-signal pairs $(R_i S_i)$ present in at least 1 OTU in the population

Signal-Receptor Activation Matrix K_{ac}

- ▶ Represents all receptors-signal pairs ($R_i S_i$) present in at least 1 OTU in the population
- ▶ Different sets of receptor-signal combinations can produce the same K_{ac}

Signal-Receptor Activation Matrix K_{ac}

- ▶ Represents all receptors-signal pairs $(R_i S_i)$ present in at least 1 OTU in the population
- ▶ Different sets of receptor-signal combinations can produce the same K_{ac}
- ▶ K_{ac} is of dimension $|R| \times |S| = |N| \times |N|$
